SUMMARY

Senior Software Quality Engineer with 10+ years of experience in software engineering, test automation, CI/CD, and cloud-native technologies. Strong background in automation engineering, infrastructure, and application reliability, with a focus on streamlining development processes, improving system quality, and accelerating software delivery.

PROFESSIONAL EXPERIENCE

SENIOR SOFTWARE QUALITY ENGINEER | SUSE | Remote | Nov 2022 - Present

- Engineered rancher/tfp-automation, an automated GitHub framework that streamlined Rancher test environment creation and automated validation for the Rancher2 Terraform provider.
- Implemented GitHub Actions workflows across GitHub repository rancher/tests. Resulted in daily regression testing across multiple Rancher release lines and reduced release testing from a week to under a day.
- Led validation of complex Rancher defects by designing test strategies, reproducing issues across diverse environments, and performing root cause analysis to accelerate resolution and improve product reliability.
- Owned Rancher release validations, optimizing release workflows, and accelerating release delivery.

SOFTWARE QUALITY ENGINEER | SUSE | Remote | Apr 2022 – Nov 2022

- Developed automated test cases for Rancher QA frameworks, expanding test coverage and improving test efficiency.
- Performed issue validation testing for Rancher, identifying defects, and delivering detailed test results.

PRODUCT ENGINEER | ESRI | Redlands, CA | Nov 2019 – Apr 2022

- Served as lead product engineer for the initial release of ArcGIS Enterprise on Kubernetes, establishing scalable deployment and configuration processes to enable reliable enterprise-grade installations.
- Expanded ArcGIS Enterprise for Linux platform support by certifying Ubuntu, RHEL, SUSE, CentOS and Oracle Linux distributions, ensuring compatibility and production readiness across enterprise environments.

SUPPORT ENGINEER | ESRI | Redlands, CA | Jan 2018 – Nov 2019

- Resolved ~800 ArcGIS Enterprise customer support cases, achieving a 98% customer satisfaction rating.

SKILLS

Languages: Go, Python, Bash
Cloud & Infrastructure: AWS, Azure, GCP, Terraform, VMware vSphere
Containers & Orchestration: Docker, Kubernetes, Rancher, AKS, EKS, GKE
CI/CD & DevOps: Git, GitHub Actions, Jenkins
Operating Systems: Ubuntu, RHEL, SUSE, macOS, Windows Server (2019, 2022, 2025)
Methodologies & Testing: Agile, Functional, Stress, Regression, E2E, Smoke, Sanity

EDUCATION

University of Colorado Boulder	M.S. Computer Science	Nov 2025 – Aug 2027 (Est.)
University of California – Merced	B.S. Computer Science & Engineering	Aug 2012 - May 2016
