Summary

Senior Software Quality Engineer with 10+ years of experience designing automation frameworks, developing CI/CD testing solutions, and validating cloud-native applications.

Work Experience

Senior Software Quality Engineer

Nov 2022 – Present

SUSE • Remote

- Engineered rancher/tfp-automation, a Go and Terraform-based framework that streamlined Rancher test environment provisioning and automated Rancher2 Terraform provider validation.
- Implemented GitHub Actions workflows within rancher/tests to automate cluster provisioning and Day 2 operations, enabling parallel testing across Rancher release lines and reduced release testing from 3–5 days to under 1 day.
- Led validation of complex Rancher defects by designing test strategies, reproducing issues across diverse environments, and performing root cause analysis to accelerate resolution and improve product reliability.
- Owned Rancher release validation as release captain, optimizing release workflows and accelerate release delivery.

Software Quality Engineer

Apr 2022 – Nov 2022

SUSE • Remote

- Developed automated test cases for Rancher QA frameworks, expanding test coverage and improving test efficiency.
- Performed issue validation testing for Rancher, identifying defects and delivering detailed test results.

Product Engineer

Nov 2019 – Apr 2022

ESRI • Redlands, CA

- Served as lead product engineer for the initial release of ArcGIS Enterprise on Kubernetes, establishing scalable deployment and configuration processes to enable reliable enterprise-grade installations.
- Expanded ArcGIS Enterprise for Linux platform support by certifying Ubuntu, RHEL, SUSE, CentOS and Oracle Linux distributions, ensuring compatibility and production readiness across enterprise environments.

Support Engineer

Jan 2018 – Nov 2019

ESRI • Redlands, CA

- Resolved ~800 ArcGIS Enterprise customer support cases while achieving a 98% customer satisfaction rating.

Skills

Languages: Go, Python, Bash

Cloud & Infrastructure: AWS, Azure, GCP, Terraform

Containers & Orchestration: Kubernetes, Rancher, AKS, EKS, GKE

CI/CD & DevOps: Git, GitHub Actions, Jenkins, CI/CD Pipelines

Operating Systems: Linux, Windows, macOS

Education

University of Colorado Boulder

Nov 2025 – Expected Aug 2027

Computer Science | Master of Science (MS)

University of California - Merced

Aug 2012 – May 2016

Computer Science & Engineering | Bachelor of Science (BS)
